

The Galleria - Al Maryah Island Abu Dhabi

Project

The Galleria, located on Al Maryah Island, is one of Abu Dhabi's most prominent lifestyle destinations. Offering an array of exceptional shopping locations, dining facilities and entertainment hubs, guests can discover a wide range of international and regional brands such as Balenciaga, Christian Dior, Gucci, Hugo Boss and more. The Galleria introduces customers to luxurious items from around the world whilst catering for the rest of the family with their VOX Cinema, Family Park area and activity arena 'The Xtreme Zone'. First opened in 2013, the mall has expanded vastly to meet the needs of Abu Dhabi's countless visitors and to enhance the aesthetic and improve the sound quality throughout the facility, our workforce contributed with our seamless acoustical ceiling solution.

Lahnau Akustik's Mikropor Acoustic Ceilings offer a visually appealing solution with numerous benefits beyond just their smooth appearance. These ceilings effectively reduce noise levels, creating a peaceful shopping environment for customers. Additionally, the integrated cooling technology and high thermal conductivity allow for reduction in energy costs. The product's fire protection properties help prevent the spread of flames, while its high light reflectivity also contributes to energy savings. With up to 100 W/m² active cooling capacity and easy installation without removal of preinstalled surfaces, Mikropor promotes an eco-friendly approach and efficient project completion.

Our workforce, highly experienced with our selection of exclusive materials, were able to support our client with achieving their required finish and greatly improve the customer experience within the mall. Whether it be decorative, industrial or hygienic products, our vast knowledge within the construction industry reflects throughout all of our application with the teams impressive attention to detail and passion towards each project. With our beautifully crafted finishes continuing to impress our extensive list of prestigious clients, Duphill's applications will continue to speak volumes and contribute to the development of our legacy.

Completion Date: July 2021

Area Applied: 2,200 m²
