

Miral Asset Management Headquarters Abu Dhabi

Project

Established in 2011, Miral Asset Management has become one of the biggest real estate and investment companies throughout Abu Dhabi. The company is responsible for the development and management of Yas Island, Abu Dhabi, and deals with a vast list of prestigious clients within the UAE to assist with the operation of their properties. Miral currently owns and operates attractions such as Ferrari World, Warner Bros. World, Yas Waterworld and they are also responsible for the upcoming SeaWorld Abu Dhabi which is set to be an attraction visited by many worldwide. With projects as high-end and grand as this, the Miral Asset Management Headquarters needed to reflect the achievements of the ever-growing company and for these requirements, Duphill had the perfect solution.

The material selected was Diasen's Decorkrete for its various durability and aesthetically pleasing qualities. Made in Italy, the material was a great option for our client as it offers a seamless, easy to clean surface whilst obtaining extreme durability to the high foot traffic the areas will be facing. Applied at just 2-3mm, Decorkrete also offers numerous colors and effects that, when applied by a skilled team of craftsmen, allowed our client to have full creative freedom from start to finish. The flexibility and accessibility of the material allowed our team to apply the Decorkrete on top of the previous surface, reducing the time on site and meeting the tight refurbishment schedule.

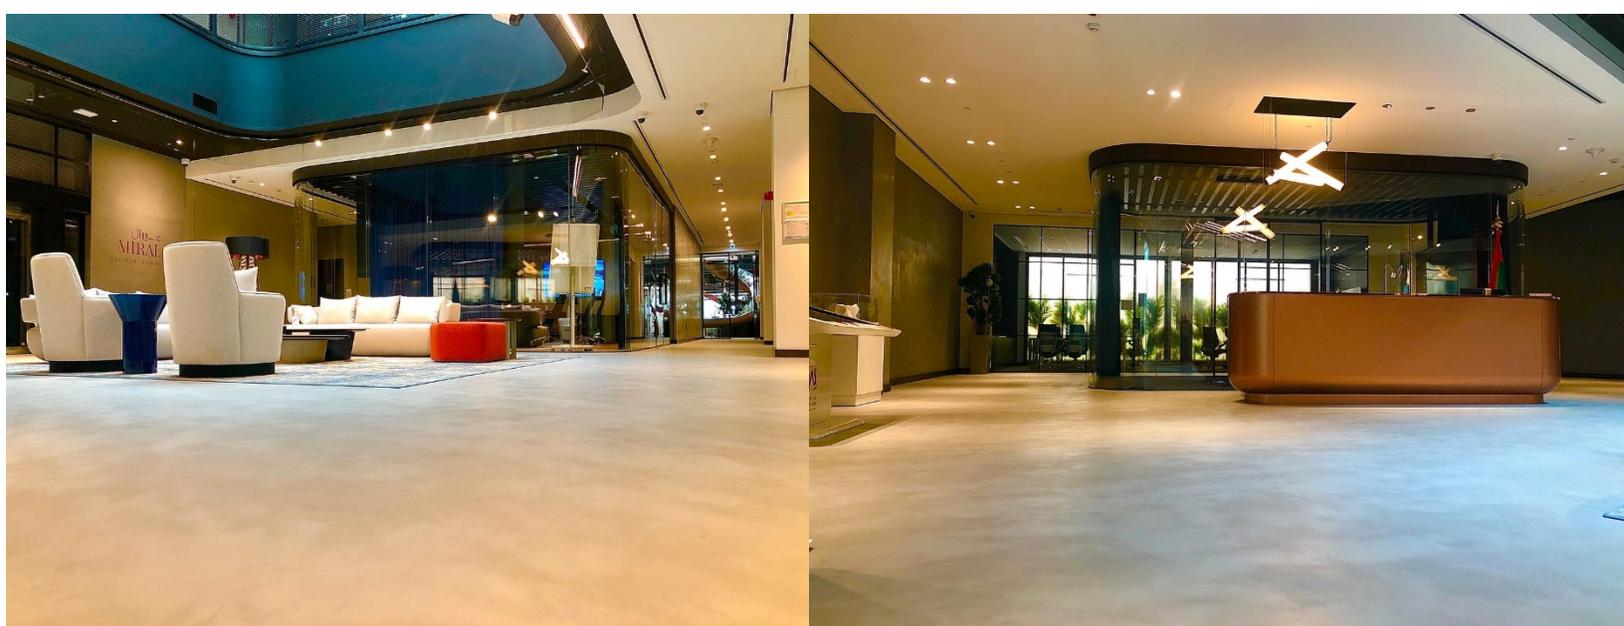

Our experienced workforce have tested and perfected the application of each material and Decorkrete is just one product from our vast catalogue of decorative solutions. With a passionate, motivated team, the results will continue to impress the visitors of the Miral Headquarters and thanks to our high-quality materials, the finish will be sure to maintain its appearance and benefits for over 10 years.
