

DAMAC Residenze – Residential Bathrooms Dubai Marina

Project

Formerly named DAMAC Heights and Ocean Heights 2, DAMAC Residenze is an 88-storey skyscraper located in Dubai Marina which has obtained the title of being the fifth-tallest residential tower in the world. With views of the Arabian Gulf and Palm Jumeirah, the building is elegantly designed with luxurious, spacious apartments to enhance the property owner's wonderful waterfront lifestyle. Surrounded by energetic life throughout five-star resorts, boutique hotels, restaurants and more, Dubai Marina is one of the city's most popular residential areas and DAMAC Residenze contributes vastly to the ever-growing demand for the canal city lifestyle. Within DAMAC Residenze, each property has been built with a similar design but once the apartments are purchased, all creative control comes down to the owner.

To enhance the regular aesthetic of the residential properties, our client requested to have our cutting-edge Microtopping, supplied by our partners of Ideal Work, solution on the walls throughout two bathrooms. Due to the 2-3mm thickness, our team were able to apply Microtopping onto the previous surface with a small amount of preparation work, encouraging a quick turnaround and reducing site wastage. Applied completely seamlessly, Microtopping is an easy to clean, highly decorative surface that is guaranteed to impress visitors of any property with its unique and unrepeatable finishes. The product also allows you to meet any design requirements with its grand collection of colours, shades and textures, bringing any creative ideas to life with ease.

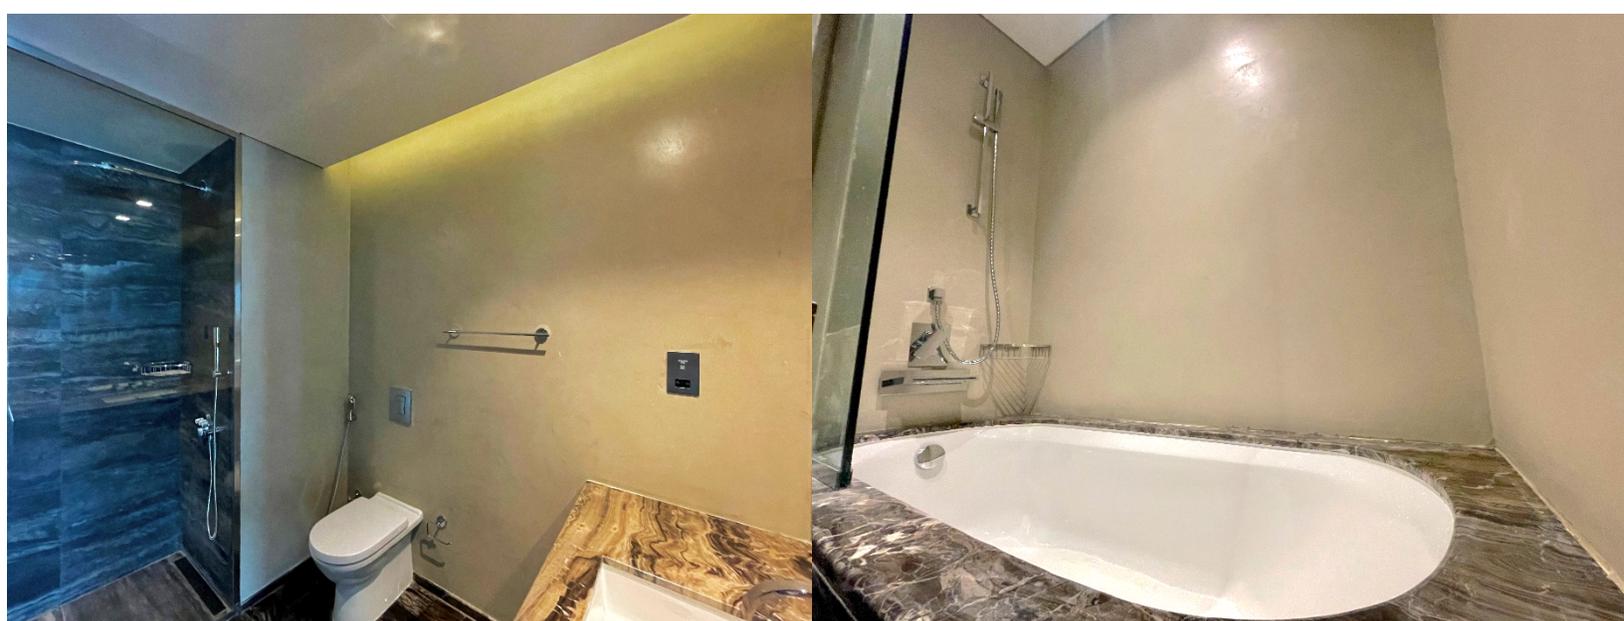

No matter the project size, our workforce are always delighted to apply our wide selection of niche materials and support our clients with creating their dream home. This project is a great demonstration to the team's attention to detail with the cloud-like effects being displayed throughout the two bathrooms, the property is sure to stand out from the standard apartments within the tower. Our knowledge and application experience is what continues to separate us from our competition.

Completion Date: March 2022

Area Applied: 50 m²

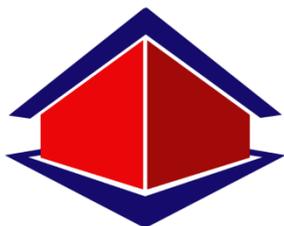

Client: Private Landlord

System: Microtopping®

Our Mission

Since 2011, Duphill's vision has always been to achieve excellence in every project we deliver. This high standard is what keeps our dedicated team continuously applying our core value of **"Delivering Quality on Time"** and guarantees satisfaction for all our valuable clients.
