

Americana Group – Food Processing Facility Dubai Industrial City

Project

Established in 1970, Americana Group have earned their title as a global leader within the food production market throughout 13 countries within Africa and Asia. The main line of business is manufacturing of food products and this has led Americana to accumulating a large network of clients within Africa and Asia such as KFC, Hardee's, Krispy Kreme and many more. Committed to providing great quality food, the products are produced in their warehouses and distributed to their wide range of partner restaurants and retail stores to feed the mouths of their countless customers. Striving for excellence in all areas of the market, Americana's warehouses are required to obtain a high level of hygiene to guarantee production standards are not tarnished by the surrounding environment. Our workforce were delighted to install our unique materials to ensure the client maintains a consistent standard of hygiene.

To support Americana's hygiene requirements, our team installed Fiberglass Reinforced Plastic (FRP) panels to the entire food processing facility to obtain a resilient, easy to clean surface throughout each production line. FRP is a HACCP certified antimicrobial solution, perfect for food processing plants and restaurants due to its resistance to chemicals, moisture, and extreme durability. The system is installed with a heavy bond adhesive and applied directly to the surface to transform any pre-existing infrastructure. FRP also offers a sleek design which gives the processing plant a new, refreshing aesthetic with countless beneficial qualities. The new surface allows the staff members of the facility to continue their duties without the worry of contamination or bacterial spread.

Our workforce are extremely honoured to assist Americana in reaching both their hygiene and aesthetic requirements. Our turnkey solutions are always sure to fulfil the needs of our clients and surpass any challenges that may come our way. Our skilled craftsmen have obtained vast knowledge over the past decade to ensure each application is completed to the highest standard. The new surfaces installed throughout the food processing facility are guaranteed to provide an easy-to-clean, antimicrobial finish which will benefit the staff members for many years to come.

Completion Date: April 2022

Area Applied: 3,000 m²

Client: Gulf Food Company Americana LLC

System: Fiberglass Reinforced Plastic (FRP) Hygienic Wall Panels

Our Mission

Since 2011, Duphill's vision has always been to achieve excellence in every project we deliver. This high standard is what keeps our dedicated team continuously applying our core value of **"Delivering Quality on Time"** and guarantees satisfaction for all our valuable clients.
