

Serena Bella Casa – Residential Garden Dubai

Project

Containing a mix of 2, 3, and 4 bedroom townhouses and 3-bedroom semi-detached villas, Serena Bella Casa is a premium residential development created by Dubai Properties at Dubailand. The development promises a brand-new idea of living experience with homes that include modern design and others which host more contemporary architecture that is somewhat inspired by the Mediterranean Spanish theme. Every home has been designed to fit your evolving lifestyle narratives and Serena Bella Casa continues to draw the residents with its peaceful and pleasant surroundings and stunning views of the surrounding landscape. Our client was looking to renovate the garden area of their home to bring their design dreams to life and our workforce were delighted to support this process with our incomparable wood decking system, Richmond WPC Wooden Decking.

Richmond WPC Wooden Decking was applied to the main exit area from the property into the garden to meet the design requirements of our client and enhance the exterior aesthetic, displaying premier finishes as soon as you walk out. WPC Decking is an extremely durable and very low maintenance decking system which is incomparable to standard timber as it contains polymer within the mixture. This additional component supports the strength of the surface whilst offering additional flexibility, capable of withstanding the extreme temperatures within Dubai and eliminating possibilities of cracking, debonding and warping. Our decking system is also a sustainable alternative to standard wood flooring as it is recyclable, eco-friendly and low carbon. The system also promises a fast turnaround for installation, perfect for any residential projects and allowing you to renovate without the stress of continuous workers on your property.

Our team of experts were able to complete the exterior decking application over the course of an extended weekend to meet our client's timescale whilst ensuring longevity of the finish. What sets Duphill apart from other installation companies is our attention to detail and the high quality of products we select for our applications. With more than 10 years of experience, our workforce guarantees not just aesthetic delight but also long-lasting results for our clients to appreciate for years to come.

Completion Date: April 2022

Area Applied: 50 m²

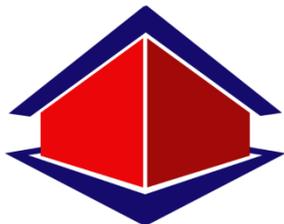

Client: End User
